Affiliate Network Coverage & Partnership Gaps

10 November 2026 · har merchant ka routing code aur environment se nikala gaya (affiliateNetworkFor) · try1second.com

MERCHANT DOMAINS SCAN KIYE	KISI NETWORK SE COVERED	KAHIN SE NAHI (TARGETS)
130	**21**	**109**

Routing kaise kaam karta hai ab: har exit pehle admin override dekhta hai, phir Amazon tag, phir wahi network jo us merchant ko claim karta hai — Admitad (`ADMITAD_MERCHANTS` + `ADMITAD_LINK_TEMPLATE`), VCommission, INRDeals, Cuelinks, LinkInR, Ekaro/EarnKaro — aur agar koi nahi, to seedha merchant. Ek merchant sirf ek hi network se paisa deta hai, isliye double attribution nahi hota. Admin dashboard (`affiliate_configs`) se kisi bhi merchant ko manually kisi bhi network pe override kar sakte hain.

3. Agla kadam

1. **Finance pehle** (16 domains): BankBazaar/Paisabazaar/PolicyBazaar publisher programs — CPA sabse zyada.
2. **Travel/OTA** (22 domains): Cuelinks/Admitad me campaign join, phir domain `CUELINKS_EXTRA_MERCHANTS` ya us network ke `*_MERCHANTS` me daal dein.
3. **Chain hotels** (Marriott/Hilton/Accor/ITC/Taj): inke apne partner programs hain (Impact/partner portals) — direct onboarding better hai.
4. **Airlines**: koi public affiliate nahi — in par sirf ads, isliye affiliate effort waste na karein.
5. **Har join ke baad** wahi domain env me add karein — dobara code deploy nahi chahiye.

Report generated 10 Nov 2026 from the live routing code (server/affiliate/deeplink.ts: affiliateNetworkFor) + current environment. Ek caveat: admin `affiliate_configs` rows production MySQL me hain aur yahan readable nahi hain, isliye jis merchant ka wahan manual row hai wo paid ho sakta hai chahe yahan "none" dikhe. Baaki saare layers (Cuelinks allow-list, Amazon tag, LinkInR sheet, Ekaro key, env networks) exact hain.
